Display	Tost mod	Description e Possible effect	Possible Cause	Check / Remedial act	ion / Remark
FATAL / REM		- washing or drying program aborted	- display is frozen		
ERROR sequ		- door is locked possibly	- pump is activated possibly		
Erritort soqu	011001	- operator control actions are blocked	partip to douvated possibly		
34	E:34	Door lock can not be locked	- door lock is broken	- switch ON/OFF for re	set
		- washing program is aborted	- door, or door hook is stuck	- check door lock	
		- door is unlocked possibly	- stiff gasket	- check mechanic	
		- operator control actions are blocked	3.1	- check wire harness	
35	E:35	Door lock can not be unlocked	- door lock broken	- switch ON/OFF for re	set
		- FATAL ERROR without prgram abort	- Window clamp	- check door lock, mec	hanism, and wire
		and pumping	- gasket to inflexible	harness	, , , , , , , ,
37	E:37	Error of temperature sensor: break	- NTC is broken	- check NTC, and wire	harness
		- washing program will be finished without heating		Pos. 6 Heater	
38	E:38	Error of temperature sensor: short-circuit	- NTC is short-circuit	- check NTC, and wire	harness
		- washing program will be finished without heating		Pos. 6 Heater	
40	E:40	Error of mains frequency synchronisation	- weak power supply	- Check power supply	
		- washing program is aborted		Normal mode	
42	E:42	Uncontrolled run up of drum motor	- Speed sensor, control, or triac on control is	- start test mode for res	set
		- FATAL ERROR without 90sec pumping	broken	- check control	
			- Motor is blocked, drum is blocked by laundry	Pos. 3 Motor, normal n	node
43	E:43	Locked rotor (for normal mode only in	- drum is blocked by laundry	- switch ON/OFF for re	set without laundry
		error stack and Last Error)	- motor is blocked	- check load, check mo	tor
		- washing program is finished with limited motor running		Pos. 3 Motor	
44	E:44	Test of reversing relay failed	- control is broken	- start test mode for res	set
		- FATAL ERROR without 90sec pumping	- triac is broken	- check control	
				Pos. 3 Motor, normal n	node
56	E:56	Power unit & operating unit communication error	- faulty D-Bus communication between	- switch ON/OFF for re	set
		Normal mode: - appliance is switched off after 60s,	PU and OU	- check wire harness b	etween PU and OU
		error is stored			
		Test mode: FATAL ERROR (a)
